EDUCATION

Graphic Era University

B.Tech in Computer Science

Dehradun, Uttarakhand

Jul. 2016 – May 2020

EXPERIENCE

Software Development Engineer II

Instahyre

Remote, India

Jan 2025 – Jan 2026

- Built end-to-end features using Angular + Django for employer-facing recruitment platform, including candidate screening modules (activities, notes, interview scheduling, evaluations).
- Performance optimization: Migrated company-wide Django templates to Jinja, reducing page load times from ~1000ms to <200ms (5x improvement); optimized key APIs via SQL refactoring, async task offloading, and caching.
- Frontend leadership: Architected Angular component structure for unified candidate sidebar view, integrating 5+ modules with responsive UI and seamless Django REST API integration.
- Mentored SDE 1 engineers, conducted code reviews, and led production debugging using Datadog, Sentry, and Logz.io.

Business Integration Specialist

Cloudify

Remote, India

Aug 2024 – Dec 2024

- Led full-stack development using Django, Express, React, Next.js on AWS Serverless (Lambda, SST) and Azure; built production applications with modern frontend (React/Next.js + TypeScript) and RESTful API backends.
- Delivered 3rd-party integrations: Amazon SES (email), MSG91 (WhatsApp/SMS), Stripe (payments), Celery/Redis (task queues), Shopify/WooCommerce custom solutions.
- Managed project sprints, daily stand-ups, code reviews, and production deployments; ensured 99%+ uptime and responsive UI across devices.

Lead Software Developer

Saara Inc

Remote, India

May 2022 – Aug 2024

- Built AI-powered products from scratch: Led full development lifecycle (product discussions → UI/UX design → backend logic → cloud deployment) using Django, React, Next.js, TypeScript, Azure/AWS.
- SalesGPT: Designed Django + PostgreSQL backend for OpenAI-powered virtual sales assistant; created interactive React chatbot UI with real-time messaging and dynamic product recommendations; executed end-to-end Azure deployment (server setup, SSL, database config).
- Collaborated with product/design teams to ship pixel-perfect UIs; iterated based on user feedback and analytics.

Software Engineer

SHL

Remote, India

Jul 2020 – May 2022

PROJECTS

Telegram Chat Manager | *Python, FastAPI, Telethon, Uvicorn, Pydantic, PyInstaller*

- Self-hosted Telegram account manager with web UI and CLI. Bulk delete chats, identify spam accounts, and clean up your Telegram without sending data to third parties.

Automated Portfolio & Resume System | *Astro, React, TypeScript, TailwindCSS, Python, Jinja2, Gemini API, Qdrant, FastAPI, GitHub*

- Full-stack portfolio platform with CI/CD pipeline: JSON configs dynamically populate both React/TypeScript website and auto-generated LaTeX resume PDF via Python + Jinja2 templates. GitHub Actions workflow auto-builds and deploys on every commit, eliminating content sync issues.

Message Scheduler | *Python, Django, Celery, Redis, Amazon SES, Telegram Bot API*

- Automated message scheduling system with Django backend and React UI, supporting email and Telegram delivery. Features include cron-based job execution, recurring notifications, and scalable Celery/Redis task processing.
